

## Business intelligence – Lab5

Today's lab is designed to test your skills in applying what you have learned. Please upload the dataset and start creating a report in the manner you find appropriate.

This dataset contains comprehensive information on 2,392 high school students, detailing their demographics, study habits, and academic performance...

### Report Guidelines:

- You must have 2 pages minimum.
- Create meaningful charts (pie, line, bar, ...).
- Create a clear card visualization(min,max,count..).
- Use filtering (slicer).
